

# Health & Yoga Products

Physical purity was given great importance in the ancient yoga system. Shatkarma is the six yogic purification techniques as outlined in the "Hatha Yoga Pradipika". The purpose of these cleansing techniques are to keep the body strong, clean and healthy. They are said to remove toxins and anything blocking the flow of prana in the body. Our yoga-inspired products are based on principles of Shatkarma and help yogis to practice Shatkarma more effectively.
